DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I, claims 1-8 and 20 in the communication filed on 07/31/2005 is acknowledged. Claim 31 has been cancelled and claims 37-38 have been amended. Group I is further restricted to a species election.

A telephone call was placed to Janet E. Embretson for a species election on to Wednesday September 6, 2006 at 9:30 AM. She requested that the Examiner provide a written communication for the species election.

Claim 1 generic to the following disclosed patentably distinct species: a cholesterol recognition/interaction amino acid consensus sequence comprising SEQ ID NO: 26. The species are independent or distinct because all alternatives of a Markush Group must have a common structure. The species of the cholesterol recognition/interaction amino acid consensus sequence comprising SEQ ID NO:26 are not regarded as being of similar nature because the species do not appear to share a common structure.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an

Art Unit: 1647

allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
